

Climate Action Events Program

The Climate Action Events program supports events that share knowledge and ways of knowing, build skills and/or foster meaningful conversations to advance climate action within BC. Funding is available for organizations and groups, including student groups, at post-secondary and other educational institutions; Indigenous organizations; and community-based and non-governmental organizations (NGOs) actively working on climate change. PICS will prioritize funding for events that provide direct value or benefit to communities and that include and/or explore the connections between mitigation and adaptation, and are rooted in principles of climate justice and reconciliation. Please see the [Climate Action Events FAQ](#) for full program details.

Contact Information
